

Customer Success Story

Everest

Kassatex is a wholesale distributor of high-quality towels, bathrobes and bathrugs. With headquarters in the heart of New York City's textile district, and sourcing locations in China, Turkey and South America, Kassatex is able to provide superior bath products at affordable prices through an extensive range of collections.

Kassatex has enjoyed success and strong growth since its founding in 1999 and its name continues to grow in popularity. In 2002, the company became EDI-compliant to supply several major retailers. Realizing that they could streamline their EDI process by integrating it with their back-end Everest accounting system, Kassatex decided to implement an eBridge Integration Solution.

With the eBridge Integration Solution, data from 850 purchase orders sent by trading partners is automatically moved and integrated into the back-end Everest accounting system. This process liberates staff resources and saves time for Kassatex, as manual and duplicate data entry is no longer required.

The data inputted into Everest remains accurate as it is received directly from the source. This original accurate data is then used to create invoices for automatic transmission to an invoice factoring company. The data is also utilized to send 940 Warehouse Shipping Orders to the Kassatex warehouse in New Jersey.

Ernesto Khoudari, President of Kassatex, is impressed with the benefits provided by the eBridge solution. "We implemented eBridge in order to save time entering sales orders into Everest. We also save time by exporting the sales orders through eBridge to our warehouse directly," stated Mr. Khoudari.

By streamlining their EDI process with the eBridge Integration Solution, Kassatex has achieved its desired goal of increasing efficiency by eliminating manual order entry, ensuring that staff are better able to focus on more productive matters to help increase the popularity of the Kassatex name.
