

Customer Success Story

Exact Macola

A pioneer in the development of products for worker comfort and safety, Ergodyne Corporation of St. Paul, Minnesota, prides itself in providing protective and practical work wear and gear to workers at job sites all around the world. From gloves, knee pads, back and wrist supports to high-visibility apparel and warming and cooling wearables, Ergodyne's "Tenacious Work Gear" is designed to increase productivity and ensure safety through durability, comfort and convenience.

Ergodyne has enjoyed tremendous success since its founding in 1983, and today millions of workers don and use their products every day. In 2000, the company implemented EDI to comply with the demands of its top trading partner. As a successful company, Ergodyne subsequently saw the advantages of integrating their EDI process with their back-end Exact Macola software. For this integral piece, Ergodyne decided on the eBridge Integration Solution.

The eBridge Integration Solution automatically moves and integrates data from inbound EDI orders to Macola, eliminating manual and duplicate data entry to liberate resources, eradicate errors and save time. In turn, the eBridge Solution automatically creates and sends the outbound Invoice and ASN to trading partners, ensuring information on these documents is accurate.

Derrick Wagoner, Accounting Coordinator at Ergodyne, has appreciated the benefits provided by the eBridge Integration Solution. "We wanted to reduce the time spent on order entry and billing for our top 10 customers, as well as improve accuracy," stated Mr. Wagoner. "The time saved on orders is amazing. Over 300 orders received are entered in less than a minute and guaranteed accurate."

With the initial benefits of EDI already in place, such as increased cash flow for accounts receivable and savings on postage, paper, and envelopes, the eBridge Solution completed Ergodyne's EDI process by integrating their back-end accounting system. By making such a smart decision, Ergodyne can continue to focus on its vision to achieve worldwide dominance with its Tenacious Work Gear.
