

## **eBridge Software Confirms Software Compatibility with Windows 7**

**BURLINGTON, Ontario [Feb 5, 2010]** – eBridge Software Inc. has announced that all of its Windows applications are compatible with Microsoft's latest operating system, Windows 7, which was released on October 22, 2009. eBridge's applications are however dependant on a variety of third party accounting packages, which may or may not be certified for Windows 7 at this time. eBridge advises any customers concerned with compatibility issues to contact the publisher of their accounting package to verify their support for Windows 7.

Windows 7 is the latest version of Microsoft Windows, a series of operating systems produced by Microsoft for use on personal computers, including home and business desktops, laptops, net-books, tablet PCs and media center PCs.

Unlike its predecessors (XP and Vista), which introduced a large number of new features, Windows 7 is intended to be a more focused, incremental upgrade to the Windows line, with the goal of being fully compatible with applications and hardware with which Windows Vista is already compatible.

### **About eBridge**

Founded in 1993, eBridge Software leads the small to medium sized (SME) market in accounting software integration. Our powerful combination of Integration-as-a-Service (IaaS) ePortal – including over 700 predefined connectors for EDI, ecommerce, CRM, and warehouse management—and our eBRIDGE adapters with over 37 accounting packages, makes eBRIDGE Software the only 'last mile' integration-as-a-service company to offer such a wide range of integration solutions. Our complete and flexible integration solution streamlines your business processes, saving you time and money.
